Junior Fullstack Developer - [Portfolio](#)

As a **Junior Fullstack Developer** with a background in the maritime industry, my transition into web development has been both challenging and rewarding. With a strong foundation in the **MERN stack** (MongoDB, Express.js, React.js, Node.js), I am skilled in building dynamic, responsive, and scalable web applications. I bring a fresh perspective and a problem-solving mindset, honed from years of working under pressure in the maritime industry.

I'm well-versed in **TypeScript** for type safety and clean, maintainable code, and I use **Tailwind CSS** to create responsive, utility-first designs. I also enjoy creating smooth, interactive animations with **Framer Motion** to enhance user interfaces and experiences. With **Next.js**, I build SEO-friendly, high-performance web applications that support server-side rendering and static site generation.

With strong version control skills in **Git** and **GitHub**, I effectively collaborate with teams and maintain code quality across projects. I'm always eager to learn new technologies and tackle new challenges, bringing my passion for development and continuous growth to every project.

EDUCATION

GOIT Philippines Bootcamp
July 2024

Fullstack(MERN)

SKILLS

- MERN Stack(MongoDb, Express.js, React.js,Node.js)
- Socket.io
- Docker
- JWT
- Google OAuth2.0
- GIT & GITHUB
- NEXTJS
- Firebase
- Tailwind CSS
- Typescript
- Framer–motion

PROJECTS

Image Search Application using Pixabay API
[Link](#)
Developed an image search application utilizing the Pixabay API. The application allows users to input a search query and receive an array of images that meet the request parameters. Implemented pagination to enhance user experience.

Integrated SimpleLightbox to provide smooth and visually appealing image animations.

Technology Used: HTML, CSS, JS

Responsive MovieSearch Application using TheMovieDb API
[Link](#)
Developed a movie application using React.js, designed to provide users with an engaging experience for browsing and discovering movies. The app leverages modern React features and integrates with an external movie database API for data fetching.

Utilized Axios for making HTTP requests to the API

Technology Used: React JS

Slim Mom App – MERN Stack
[Link](#)
Collaboratively developed a fullstack Slim Mom application using the MERN stack (MongoDB, Express.js, React, Node.js). The application features JWT authentication for secure user access and integrates Google OAuth2 for seamless login. Utilized Axios for efficient HTTP requests, Redux for state management, and Swagger for API testing.

Technology Used: MERN(MongoDb, Express Js, React, Node)

Realtime Chat App

[Link](#)

Developed a real-time chat application using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Socket.io for seamless, bidirectional communication. The frontend is deployed on Vercel, while the backend is hosted on Render.

Technology Used: MERN(MongoDb, Express, React, Node), Socket.io, Vercel, Render

Portfolio

[Link](#)

This is my personal **portfolio website**, designed to showcase my skills, projects, and experience as a web developer. Built with **Next.js** and **Framer Motion**, the website is both a visual representation of my technical expertise and a functional tool to demonstrate my work to potential clients and employers. The website highlights my proficiency in building modern, interactive, and responsive web applications while providing a seamless user experience with smooth animations and fast performance.

Technology Used: NextJS, Framer-motion, Tailwind CSS, Typescript
